

# When is the Right Time to Neuter Your Dog?

If you are deciding to neuter, make the right call at the right time. Our simple, science-led test helps you know exactly when to neuter your dog – for their health, happiness, and long life.

-  Vet Approved
-  Backed by Science
-  Loved by Dog Owners Nationwide

## When is the Right Time to Neuter Your Dog?

As a loving pet parent, you want what's best for your dog. But when it comes to neutering, timing isn't just a detail – it's critical. Neutering too early can disrupt growth and development. Leaving it too late can increase certain health and behavioural risks. With NeuterReady, you'll know the exact time your dog is hormonally and physically ready – so you can make an informed, confident choice.

"We have a background in the veterinary industry and knew that recent research supported allowing puppies to reach hormonal maturity... Knowing that time frame allowed us to make the best decision for our puppy... We highly recommend taking this test that opens up real options based on new data"

— B.R. Crosbie, Pet Owner

## Get the Timing Right. Give Them the Best Life.

Your dog's body develops at its own pace – and with the right timing, you're setting them up for a long, healthy, tail-wagging future.

### Stronger Bones & Joints

Reduced risk of joint instability and orthopaedic issues.

### Fewer Behavioural Problems

Lower chance of aggression, anxiety, or reactivity.

### Lower Health Risks

Decreased risk of certain cancers and hormone-related conditions.

### Longer, Happier Life

Better health outcomes for years to come.

## Why Pet Parents and Vets Choose NeuterReady

Choosing when to neuter your dog is a big decision and we're here to help you get it right. NeuterReady takes the guesswork out of timing by giving you clear, science-backed guidance based on your dog's individual development. Vets and pet owners trust NeuterReady because it's easy to use, scientifically sound, and focused on what's right for each dog.

### Scientifically Backed

Developed in New Zealand with veterinarians

### Results shared within 2 – 7 days

A simple blood test, with results in 2 – 7 days.

### Tailored to Your Dog

Every pup is different, so we test for their individual maturity.

### Created by Vets

Developed in partnership with veterinary experts

### Peace of Mind

No more guessing – just confidence in doing what's right.

## Want to know if NeuterReady is right for your dog?
